RIDING OUT THE ECONOMIC RECESSION

The stronger companies during recessionary times tend to be penalized for failures of the weak. As companies fail, the repercussions reverberate throughout the area.

The Mona companies, as with others in the area, are continuing to pay for the current economic problems. The failure of the SMBIA Health Benefit Trust has resulted in an extraordinary assessment of over \$35,000, and the State of Maryland has assessed a surcharge on unemployment premiums based on payroll which will result in an additional \$42,000 in premium in 1992.

Neither contribute to our ability to serve the customer or to make a profit and neither was originally budgeted. But despite these distractions, we continue to focus on our goal for 1992 of a profitable year.
