Update on Accident Free Month

Congratulations Construction Department for having a Totally "Accident Free" April!

- "0" Workmen Compensation Accidents
- "0" Mona Auto Accidents

Service was also successful in having no "lost time" accidents during the month. Only one employee had a cut finger and there were two minor auto accidents during the month of April.

Pizza lunches are underway for all those who were accident free! Look for yours in the near future.

Mona Golf Outing

On May 2nd, Mona employees held the first golf outing of the season. The outing was held at White Plains. The weather was perfect and the golf was great. We had 28 players.

- The longest drive was won by Tom Fiori
- Closest to the pin was won by Bob Molts, Jr.
- Best team score was Bob Molts, Jr., Joe Dunston, Dale Collins and Kevin Hughes.

Look for future outings through the season.

Thanks to Butch Kitts for arranging tee times.

How To Guard Against Carjackers

Tourists have become the latest targets of thieves who hijack cars with the drivers still in them. How can you protect yourself against carjackers - especially when on vacation or a business trip? It helps to know how these criminals work.

Carjackers look for victims at gas stations, convenience stores and rest stops, according to the National Insurance Crime Bureau. They go after lone drivers and strike at night, when motorists are tired. Some "bump and run" - hitting the target car with theirs. When the driver gets out to check the damage, they steal the car.

Here are some tips from the Crime Bureau to guard against carjackers:

- Avoid shortcuts. Stay on interstate highways and use the center lane.
- Use full-serve lanes in gas stations late at night and keep doors locked.
- Park in a pay garage or in the center of a lot. Carjackers and other auto thieves look for out-of-state license plates and cars parked on the fringes or parking lots.
- Unpack everything. Motel parking lots are like smorgasbords to thieves looking for valuables left in cars.
- Don't drive alone at night. Carjackers usually avoid cars containing several passengers.
- Also beware of "swoop and squat" accidents: Perpetrators pull in front of another car, slam on the brakes and take a hit-then file for large damage claims against the driver.

Safety Note

Avoid Sudden Stops - slow down early.

AVOID ABSENTEEISM...

... IT COSTS EVERYBODY!
