MONA ELECTRICAL CONSTRUCTION, INC.

June 4, 1993

MONA, UNION - REACH ACCORD!

After a long series of negotiations, the Mona Companies and Local 26 have reached a multi-year agreement on the Inside Wire. The settlement is subject to ratification by the Local's membership at a meeting scheduled for Friday, June 11th. We urge all and attend.

Mona's management and Local 26 officials will now turn their attention to the common goals of aggressively meeting the non-union members back to work, and increasing the share of the market for union electrical contracting.

NEW ARRIVAL

A bouncing baby boy was delivered to Ron and Laurie Warren. Taylor Emery Warren was born on Friday, May 28th at 12:28 1/2" long. Ron is MESCO's Customer Service Manager. Congratulations.

WHY WEAR SAFETY SHOES?

Your feet come into contact with a lot of hazards. On a typical day, they may have to dodge heavy falling objects, withstand the puncture of sharp tools, and navigate slippery floor surfaces. Before you step into the workplace, look down at your feet. Are you wearing your safety footwear that will adequately protect your feet from injury? Think safety.

"Okay! I believe you. They're safety shoes."
